---

Frederico has been with Intel for over 13 years. He started his career by establishing Intel's reseller channel in Portugal and continued by developing Intel's business into the Government and Corporate areas becoming the company's Country Manager for Portugal. In 2005 Frederico moved to Spain as the manager of the team responsible for Intel's enterprise business representing over 3 million personal computers and server business. Between 2008 and 2010 he moved to South Africa to create and implement Intel's business development expansion strategy in the Sub-Saharan region where he established and developed relationships with Governments and major corporate. In 2010 Frederico became a Solutions Architect for EMEA where he works with Governments to advise and assist them in their strategies for the increase of usage of technology and internet in different areas namely Education, Healthcare and in making technology accessible to the citizens.
